

The Coronavirus Patents

Introduction

I have been explaining for over a year that the SARS-Cov-2 novel coronavirus does not exist as a natural virus. Also that an infectious coronavirus was manipulated in an American laboratory and that this was released before the Wuhan epidemic. There is strong epidemiological evidence that Covid-19 was active in Italy in September 2019 and some evidence that it was circulating globally before that.

I also mentioned, many months ago, that certain coronaviruses were patented by Big Pharma as far back as 2003.

Well now there is bombshell documentary evidence and testimony from Dr David Martin to Reiner Fuellmich's class action suit investigation¹ blowing the lid on the hard evidence for all this as exhibited in US patent records. This proves that what caused Covid was a bio-weapon made in America for profit (and other reasons). He explicitly cites the CDC, the NIH, the NIAD / Anthony Fauci and Peter Daszak as being involved in what amounts to a RICO² case and, potentially, crimes against humanity.

The people and institutions firmly in the driver's seat regarding pushing pandemic fear, restrictions, vaccines and lockdowns are the very people that created the pathogen.

I will endeavour to summarise and collate Dr David Martin's evidence in as simple a way as I can by use of a timeline.

This evidence proves categorically that the whole Covid crisis was an artificial created panic by American Big Pharma to make trillions of dollars with the chief goal to vaccinate every person on Earth (a long held goal).³

This shocking news is not being published as wide as it should be. The Conservative Woman has two pieces on it by Neville Hodgkinson (good on them). The Lockdown Sceptics blog mentioned it in passing but has not done an article on it. Brighteon has republished the video of the 2-hour interview with David Martin but not written it up. Stew Peters did a 1-hour interview. I am hoping that the dossier of Martin's evidence given to Fuellmich will be published soon.

Who is Dr David Martin; why is he trustworthy?

Martin heads up M-CAM International (Innovation Risk Management); a US company that monitors innovations relevant to financial interests. He has been commissioned by national and federation bodies, such as the EU, to investigate probity in commercial affairs, such as copyright, financial and patent issues. He investigates patents, patent

applications, federal grants, procurement records, e-government records and so on. He tracks what is happening, who is involved and monitors thematic interests.

He and his firm are the absolute top global professionals in this line of investigative work. His firm is the world's largest underwriter of intangible assets used in finance in 168 countries.

Martin has been investigating Big Pharma's involvement in coronavirus research, development and patents for more than 20 years. This involved reviewing over 4,000 patents issued around SARS coronavirus and monitoring the manipulation of the virus which gave rise to SARS.

He compared the genetic sequences, reportedly novel, and compared these to the patent records. This showed over 120 patented pieces of evidence to suggest that the declaration of a novel coronavirus was a fallacy. There is no novel coronavirus. There are, however, countless human modifications of coronavirus sequences that have been uploaded.

Patent records of sequences supposed to be novel go back to 1999. The virus is not just not novel, it has not been novel for over 20 years.

The SARS-Cov-2 patent timeline

Note: vaccinations

The elite cabal has long desired to have a rolling vaccination programme that affected everyone on the planet. They tried for decades to achieve this with constant pushes for take up of the Flu vaccines. This failed to succeed; partly because it was not effective and partly because people realised what the toxic contents were.

Having failed to succeed with Flu vaccines, the elite decided to change the pathogen and create a media / government controlled fear narrative that would be so serious that people would flock to have a vaccine to protect them from this scary monster. This was Covid, and the scheme worked. Billions of people have been vaccinated with a deadly toxin to protect themselves from a supposed virus that only kills 0.15% of infected people.

Synopsis

- The coronavirus SARS-Cov-2 is not novel. The spike protein is not novel, neither is the vaccine. There are, however, countless human modifications of coronavirus but there is no single, novel coronavirus.
- It is not a virus that jumped from animals to humans.
- The harmless coronavirus (that causes colds) was subjected to multiple laboratory modifications to turn it into a bio-weapon.
- USA Patents applied for during a period of 20 years prove this. There have been over 4,000 patents filed around SARS coronavirus.
- The objective was to create a marketing campaign to produce virus tests and vaccines (which are useless) but which have made Big Pharma trillions of dollars.
- Fauci and others gave grants to the Wuhan laboratory to continue the development, which could not be performed in American labs by law.
- The villains in this are: Tony Fauci, Peter Daszak, the CDC, the NIH, the NIAID, the WHO, the FDA and Big Pharma. These are guilty of crimes against humanity and genocide.

Quotes

There has not been a single paper, published by anyone, that has actually established anything novel since November 2019 has clinical distinction from anything that predates November 2019.

... The declaration of a novel coronavirus was actually entirely a fallacy. There was no novel coronavirus. There are countless very subtle modifications of coronavirus sequences that have been uploaded. But there was no single, identified, novel coronavirus at all.

When you inject a known toxin into a person, you are injecting an agent of death.

A computer-simulated, synthetic, chimeric, computer-generated code uploaded by the Chinese in January was given to Moderna to put into an injection ... so that your cells ... would produce the S1 spike protein synthesis, not the actual virus, ... This was a computer code uploaded by the Chinese into US manufacturing to inject a pathogen stimulant into the American population.

The DOJ has abjectly failed. ... The crime is that we have collusion between ... interlocking directorates, we have Anthony Fauci at NIAID, we have the director of the Centres for Disease Control in China and we have Dr Elias from the Bill and Melinda Gates Foundation all sitting on a board, all colluding to actually create, to price fix and market this pandemic.

This is not a virus.

Nothing started in Wuhan.

The first upload [of the coronavirus computer sequence] predated the first patient.
Dr David Martin.

The timeline

Date	Event	Patent Number
	SARS is a subclade of the beta coronavirus family (a group of RNA viruses that cause a variety of diseases in humans and animals).	
Up to 1999	Coronavirus patent activity operated only within veterinary science.	
1999 onwards	Over 4,000 patents were filed around the SARS coronavirus. Martin has investigated all of these.	
1999	Tony Fauci (head of the NIAID) ⁴ found the malleability of the coronavirus made it a potential candidate for vaccines against HIV (the claimed cause of AIDS) and received \$300 billion over 35 years. SARS is not a natural development.	
1999 onwards	Fauci funded research at the University of North Carolina Chapel Hill to create <u>an infectious replication defective coronavirus</u> .	
January 2000	The first vaccine was created by Pfizer involving the S1 spike protein. This was a canine vaccine.	
28 January 2000	Pfizer filed for a patent on a genetic sequence giving rise to a coronavirus spike protein. [This is what was claimed to be rushed into creation in a few months during 2020.] The spike protein, which is the dangerous toxin in Covid, was patented by Pfizer 21 years ago.	

⁴ US National Institute of Allergy and Infectious Disease.

October 2001	Martin monitors a huge number of bacterial and viral pathogens being patented by the NIH, ⁵ NIAID, USAMRIID ⁶ and other international agencies. Coronavirus was being considered as a potential bio-weapon. Martin reports on this publicly in 2001 and 2002.	
19 April 2002	Fauci applies for patent on his infectious coronavirus. This virus was <u>specifically targeted to invade human lung epithelia</u> (lining of the lungs). That is, the US (Fauci) made SARS long before any outbreak in Asia. The key elements of the pandemic virus were engineered (and can be modified) using gene sequencing technology (turning a computer code into a pathogen). These elements include: 1) the ACE receptor, 2) ACE-2 binding domain ⁷ and 3) the S1 spike protein. This technology was funded by the US taxpayer, supposedly, to use the harness coronavirus as a vector to distribute the HIV vaccine.	US patent 7279327.
Late 2002 to 2003	Alleged outbreak of SARS in Asia. [The coronavirus group had been endemic in nature for thousands of years. This new form was manipulated.]	
April 2003	The CDC files for a patent for the entire SARS gene sequence and for a series of patents covering means of detection, including the PCR test . The CDC gained scientific and message control of SARS by owning the virus and its detection. It is illegal to patent a naturally occurring substance. The CDC lied to justify this by saying that it would enable everyone to be free to research SARS coronavirus. The patent office twice rejected it on the grounds that it was already in the public domain. The CDC paid an appeal fine, repeatedly applied and got it approved in 2007. They then paid an additional fee to keep it private (thus denying the lie to make it open to the public). Fact checkers that deny this is SARS-Cov-2 are proved wrong by a comparison of the gene sequence patented by the CDC and what is published as the novel subclone coronavirus. There is roughly 90% similarity. The published sequences are both SARS.	US patent 7220852. Plus a number of derivative patents including: 46592703P, 776521.
23 April 2003	Three days after the CDC filing, Sequoia Pharmaceuticals (later absorbed into Pfizer and Johnson and Johnson) filed a patent application on anti-viral agents, treatment and control of infections for SARS coronavirus. This was approved before the CDC patent was allowed. This was insider information. They were patenting a vaccine for something that had not yet been published. It is a criminal conspiracy; a racket.	US patent 7151163.
2004	The whole game plan for the weaponised Covid crisis and the universal vaccine rollout using the spike protein was developed in a conference under the auspices of Moderna. This included the brand name <i>'the new normal'</i> . This also included the involvement of Tony Fauci.	
	Moderna (originally ModeRNA Therapeutics) was given the

	genetic code sequence for the spike protein that forms the basis of the Covid vaccine by telephone from the NIAID even before the subclade of the virus had been defined. That is, a vaccine to treat something before it existed.	
5 June 2008	DARPA ⁸ starts considering coronavirus for use as a bio-weapon.	
5 June 2008	Sanofi (Big Pharma based in Paris) filed a series of patents targeting genes that 12 years later are claimed to be the novel features of SARS-Cov-2 that make it dangerous to humans.	US patent 9193780 (issued in 2015 after the gain of function moratorium).
2008 onwards to 2019	Numerous organisations file patents identifying every attribute of SARS-Cov-2 as it finally came to be described. 73 patents issued between 2008 and 2019 contain the elements allegedly novel in SARS-Cov-2. The reference paper published in March 2020 claiming that a novel coronavirus courred in China from nature was a fraud. There was no natural outbreak of SARS; it was engineered by the US Big Pharma and patented for exploitation.	
12 February 2016	Peter Daszak ' <i>We need to increase public understanding of the need for medical counter-measures such as a pan-coronavirus vaccine. A key driver is the media, and the economics will follow the hype. We need to use that hype to our advantage, to get to the real issues. Investors will respond if they see profit at the end of the process.</i> ' (National Academies Press).	
2016 onwards	At the NIH board meetings, Fauci laments that the Flu vaccine was not being universally accepted.	
2018	The patent on the recombinant nature of the lung-targeting pathogen was transferred from the University of North Carolina to the NIH. But the NIH had already funded this and had rights to it. This is illegal under US law. The reason why this had to be done is that there was a typographical error in the first filing. This was the necessary patent to develop the Covid vaccine.	US patent 7279327.
March 2019	Four Moderna patent filings were amended (failed and revitalised) to include the term ' <i>a deliberate release of respiratory pathogen</i> '.	
September 2019	'A world at Risk', published by the WHO (Global Preparedness Monitoring Board), says there must be co-ordinated preparedness for a global release of a coronavirus pathogen, including public relations, crowd control and a universal vaccine.	
November 2019	Researchers at the University of North Carolina at Chapel Hill, who collaborated with the Wuhan Institute on gain of function research, along with the NIAID began the sequencing of a spike protein vaccine before the Wuhan outbreak (with Moderna). The Covid vaccine was in process before the official outbreak began. The spike protein RNA sequence is a computer simulation that has been patented for many years. This is not about combatting a virus but injecting people with a toxic spike protein.	
2 January 2020	[Chinese publication referenced by the CDC and the Lancet] 41 patients are confirmed as having a laboratory novel n-Cov coronavirus. But this was not supposedly isolated until the following week. They claimed a new pathogen not yet confirmed as having existed. [See 'Dr Sam Bailey'.]	

⁸ The US Defence Advanced Research Programme.

6 and 7 February 2020	Fauci's emails show Peter Daszak stating that a cover story was needed to distance him and the Chinese from the virus.	
Vaccine production	'A computer-simulated, synthetic, chimeric, computer-generated code was given by China to Moderna to put into an injection so that your cells, in the case of mRNA vaccines, would produce the S1 spike protein synthesis, not the actual virus ... This was a computer code uploaded by China to inject a pathogen stimulant into the American population.' Dr David Martin.	
30 March 2021	Peter Daszak's WHO investigation into the origins of Covid is widely dismissed as a whitewash.	
June 2021	The Lancet appointed Peter Daszak (head of the EcoHealth Alliance) to lead an enquiry into the Covid origins. He championed the animals to humans origin and called a lab origin a conspiracy theory. Yet Daszak has received millions from the US to investigate and modify coronaviruses himself; and works closely with Tony Fauci. In June 2021 Daszak finally recused himself without any explanation.	
2021	Martin claims that the Covid variants are also artificial. They are different gene fragments rather than natural variants. <u>They are portions of the existing SARS genetic sequence.</u> Thus new variants can be called upon at will using different clips of the string. They are a synthetic artificial sequence. There is no clinically altered gene sequence that has any clinical significance published. There is no evidence that the Delta variant is any different to published gene sequences.	
2021	There is no gold standard in the PCR test. There is nothing published showing what it is that the test is looking for. There should be a specific genetic sequence (some viral fragment) that identifies Covid. There is none. What is the test looking for?	

Dr Sam Bailey

Bailey works on the foundation laid by Martin and explains the origins of the Covid crisis showing how it was manipulated by using fraudulent genome computer sequences followed by fraudulent PCR tests.

Date	Event
December 2019	41 patients with pneumonia in Wuhan are hospitalised. The most common symptoms were: fever, cough, myalgia (fatigue) and abnormality in the chest CT images. Six patients died. There was nothing to indicate any new type of respiratory illness or a new pathogen as a monocausal agent. Ordinarily, this would be a diagnosis of pneumonia. Wuhan has a major problem with pollution giving it a toxic environment causing major problems with pneumonia.
	Despite there being no reason to claim any sort of new virus, it was decided that, '41 patients were confirmed to be infected with 2019-nCoV (SARS-Cov-2). The presence of 2019-nCoV in respiratory specimens was detected by next generation sequencing or real time RT-PCR'. They claimed to discover short genetic sequences of the envelope gene of CoV.
	How was it that they so quickly identified a new pathogen? It was the National Health Commission of the Chinese Communist Party that reported finding, 'On January 3,

	<p>2020, the first complete genome of the novel β genus coronavirus (2019-nCoVs)'. This complete genome was a fabrication. The sequence did not come from any virus, let alone a new virus. It was obtained from crude broncho-alveoli fluid samples from a single patient that contained billions of genetic fragments; not from purified viral particles. A computer was used to analyse sequences and potential combinations and combine them into a potential genome. Circular reasoning was used to claim a new virus: take a sample from a patient, claim it is new Covid, identify genetic sequences from this patient, which must then be Covid.</p>
23 January 2020	<p>Christian Drosten and his team published their study explaining the diagnostic discovery of Covid-19 by a PCR test.⁹ This protocol was '<i>designed in absence of available virus isolates or of original patient specimens</i>'. The test was based on downloaded computer genetic sequences from uploaded gene banks released by China on 3 January 2020. Still SARS-Cov-2 had not been proved to actually exist. They generated a hypothetical sequence from previously detected sequences and then created primers to target short sequences within that sequence. There was no explanation as to what these primers might react to. There was no virus involved at any stage. This dodgy paper was published within 24-hours of submission! Furthermore, several authors failed to disclose their commercial conflict of interest with the PCR test. The first edition appeared on the WHO website nine days before the paper was accepted for publication. This test was then rolled out to the world as the prime test for Covid.</p> <p>There are multiple technical issues with the Drosten paper, which have been condemned by scientists all over the world and a retraction was demanded very soon after publication. Essentially, Drosten just created a new PCR protocol that could be used to detect the new virus with no proof of its veracity. The Drosten paper has nothing to do with clinical application – how well the test works in the field. We don't know the PCR's diagnostic specificity. No nation in the world using PCR tests can provide any evidence that it can diagnose Covid (though they say it can). As the inventor of the PCR test (Kary Mullis) explained, you can find anything you want with the PCR if you manipulate it by amplification. Every drop of saliva contains many millions of bacteria and other cells. A single mammalian cell has 360,000 mRNA molecules.</p>
Late February 2020	<p>People began claiming that they had isolated SARS-Cov-2 supplying electron microscope pictures. Certain cellular debris was claimed to be the virus just because they said so. When contacted, all these people could not say that they used purified viruses. None of them used purified viral particles. They used samples from someone with a positive PCR test and then claimed the samples were the new virus. They then matched tissue samples with the Chinese published sequence and claimed a connection; but at no point has anyone isolated a new virus. The electron computer images simply show vesicles¹⁰ or viral-like particles. But these particles must be shown to cause infection and that infection must be Covid-19 (one of Koch's postulates). No one did this.</p>
	<p>The medical industry continually invents epidemics / pandemics in order to generate billions of dollars of profit. Covid-19 is the latest in a long list.</p>
Summary	<ol style="list-style-type: none"> 1) The particle known as SARS-Cov-2 has never been shown to exist in nature. 2) The SARS-Cov-2 genome is a theoretical construct from a computer programme. 3) Covid-19 PCR kits detect genetic sequences that have never been shown to be specific to a virus. They have zero established diagnostic specificity for clinical use. 4) There are no specific clinical features or confirmatory investigations for the condition Covid-19. So why is there a vaccine for Covid-19?

This confirms what I have been saying for over a year.

Ms. Karen Kingston

Kingston is a senior Big Pharma insider. She is a former Pfizer senior analyst and is currently an analyst working in pharmaceuticals and medical devices.

Kingston has done two interviews with Dr Andrew Kaufman and Stew Peters wherein she blows the whistle on what is in the Pfizer and other vaccines; how the trials were fixed and how toxic the ingredients are. Both interviews should be watched. I cannot list all the technicalities but some salient items are as follows:

- mRNA vaccines are very fragile and can be destroyed easily by sunlight and other factors. This requires them to be coated in a substance to protect them and enable them to get into cells. This coating is a lipid (fat) [aka hydrogel or lipid nano-particle]. The four PEGylated lipid nano-particles are 1) a cholesterol lipid to enable transportation by the blood. 2) Phospholipid adheres to the cell membrane to make it permeable. 3) An ionisable lipid provides a positive charge so that the mRNA can enter the cell. 4) A lipid made by SINOPEG, a Chinese company.
- One of the ingredients of this coating is graphene oxide, which aids the delivery of the mRNA. Graphene aids gene delivery. This is discovered by comparing the code name for graphene in the patent with the same code name on the SINOPEG website.
- Graphene oxide is very toxic to the human body. It is 4,000 times stronger than titanium, can host a magnetic field and is an excellent conductor of electricity.
- The graphene tends to accumulate in the organs of the body and particularly the reproductive organs. The body cannot get rid of it.
- Graphene oxide is not listed in the patent ingredients because it is poisonous to humans.
- Graphene is the main ingredient in hydrogel, which can be used to create a brain-computer interface.
- The graphene oxide in vaccines is neutrally charged (inactive), but it becomes positively charged by electromagnetic radiation, such as wi-fi, 5G etc. When this happens it kills anything it comes into contact with.
- The graphene alone will kill many people (let alone the spike protein); depending on how much of it exists in the body and where it is located.
- Multiple booster shots will increase the amount of graphene in the body.
- The Pfizer study should have been stopped when 80% of mice died within 24-hours and the rest died within a week.
- A recent autopsy proved that the spike protein had entered every organ of a vaccinated body.
- The Pfizer trials showed that viral shedding occurs with this gene treatment. This means that unvaccinated people can contract the spike protein directly from vaccinated people, such as by fluids or even dermal touch.
- The Pfizer trials showed that vaccinated people contract Covid more easily than unvaccinated people – but Pfizer covered this up. [This is now proven by hard data in the field.]
- Children should never be given the vaccine.
- All of the Covid vaccines are bioweapons.
- *‘They are just seeing how much they can put into people before they ... die.’*

Dr Luc Montagnier / Indian researchers

Montagnier appeared on the French cable TV show, Cnews on 17 April 2020. He announced that the virus that causes Covid is manmade and has elements of HIV and Plasmodium falciparum (a parasite that causes Malaria).¹¹

He referred to Indian researchers affirming the same thing published on the science website Biorxiv on 31 January 2020 (since withdrawn). They said, *'We found 4 insertions in the spike glycoprotein (S) which are unique to the 2019-nCov and are not present in other coronaviruses. Importantly, amino acid residues in all the 4 inserts have identity or similarity to those in the HIV-1 gp120 or HIV- Gag. The finding of 4 unique inserts in the 20129-nCov, all of which have identity / similarity to amino acid residues in key structural proteins of HIV-1 is unlikely to be fortuitous in nature.'*

In an appearance on the French podcast Pouquoi Docteur, 17 April 2020, Montagnier said that the coronavirus had escaped in an *'industrial accident'* while Chinese scientists at the Wuhan city laboratory were trying to develop a vaccine against HIV. We could add, resourced by Fauci and the NIH and it may not have been accidental.

Dr Judy Mikovits

Mikovits is an esteemed virologist involved in the analysis of HIV and formerly a US government virologist.

In a Brighteon interview she confirmed the following:

- The SARS-Cov-2 virus has never been isolated from human cells and was never a human virus in the first place.
- It can only be manufactured and replicated in the vero monkey kidney cell line, which is a group of epithelial cells (lung cells) extricated from African green monkeys in the 1960s.
- These monkey cell lines, contaminated with latent retroviruses, have been injected into the population since the mid-90s through the flu, MMR and polio vaccines and are the originating vector by which SARS-Cov-2 can manifest disease in humans.
- Every bio-safety level 4 lab that claimed to isolate SARS-Cov-2 from humans ultimately placed the sample in a monkey kidney cell line to 'prove' its replication. The virus is not a truly isolated human virus because it could only be replicated in the monkey kidney cell line.
- To determine whether the virus is an infectious human virus it must be taken from the blood, sputum or lung lavage of an infected human; but the infectious RNA of SARS-Cov-2 was never cultured in a continuously growing human cell line that supports replication. Since this coronavirus only replicates in vero monkey cell lines, it has never been proven to originate or spread from human to human. It is not infectious.
- Since the current flu, MMR and polio vaccines contain these same vero monkey cell lines, the only way to deploy SARS-Cov-2 is through transfection via vaccines.
- SARS-Cov-2 is a lab-made sequence that originates and spreads through the existing influenza vaccine supply. [Remember that the Dept. of Defence (US) discovered that the flu vaccine recipients from 2017 to 2018 were increasingly susceptible to coronavirus interference.]
- When you take a synthetic part of a virus and grow it in monkey cells you can get recombination events of all the monkey viruses. It is a monkey virus.

¹¹ Humans are Free, 'Nobel laureate calls Covid-19 manmade' 28 July 2021.

- The HIV component comes from the Simian immune deficiency virus, which is also a natural monkey virus.
- The vector that promises to save humanity is the tool being used to transfect us.
- The envelope of the virus, the S-1 sub-unit of the coronavirus spike protein, is assaulting the population through the very vectors which Fauci says will save us. The new infectious sequences are in the cell lines, which are then injected into the population.
- Fauci (once her boss) funded and acquired cell lines and genetic material from bio-security labs in the US (including Fort Detrick) that could be further weaponised in Wuhan. He, with others, e.g. Danszak, conducted unethical human-virus experiments using gain-of-function.
- These virus experiments using monkey cells lines can create endless variants. Two amino acid changes in the envelope of the spike can change a leukaemia virus to a Parkinson-causing virus.
- Fauci is pushing the narrative in order to cover up his crimes against humanity and blame nature. This is why Big Pharma is brutally censoring debate and contra knowledge (the same people controlling Big Pharma control the media). Fauci is the prime cause of SARS and SARS-Cov-2.
- The mandating of facemasks suppresses the immune system and makes all wearers more susceptible to disease.

Mikovits agrees with David Martin on the gene sequencing and manipulation of the alleged 'new' virus, but disagrees with Andy Kaufman (and many others) on the issue of viruses in general (that they do not exist).

Dr Richard M Fleming

In an interview with Mike Adams on InfoWars (available on Brighteon) Fleming explains how the vaccine is a bio-weapon that was developed in America and enhanced in Wuhan under the control of Fauci. This video is a must watch that is impossible for me to fully explain due to the technical arguments.

- The spike protein is the bio-weapon. The dangerous part of the alleged virus is what is in the vaccines.
- The spike protein crosses the blood-brain barrier and causes the brain to be spongy (like Mad Cow disease).
- It causes Alzheimer's Disease, due to prions in the brain.
- It damages the heart, due to blood clotting all over the body.
- The outcome is not consistent; everybody will react differently over time.
- It carries the genetic information (self-amplifying mRNA) to make more and more spike protein. It gets into the DNA and human chromosomes. The injections do not remain at the site of the injection and Moderna knew this in trial studies going back years (at least to 2017). People become spike protein factories. The medical establishment lied when it said that the mRNA stayed at the injection site and disappeared over time.
- The American government gave billions for research on gain-of function to make viruses more infectious and dangerous, even when this research was made illegal. Research papers and patents show how these genetic sequences were changed. Fauci hold patents on some HIV components that are in SARS-Cov-2.
- SARS-Cov-1 was the first bio-weapon. SARS-Cov-2 is the updated version. They were developed intentionally as bio-weapons. The total control of the media has been necessary to hide this fact and silence critiques.

- There is not one type of SARS-Cov-2. Part of the sequence of this particle is put into the vaccine. The vaccines have billions of these particles. There are at least 17 variants that can be made from this sequence. With the mass of particles (spike protein load) in the vaccine, even the healthy body develops massive inflammation as the immune system reacts to this invasion. There is something in the body that should not be there. This is what causes blood clots.
- You don't have to change these viruses much in order to create a different disease. Changing one amino acid is enough.
- The lockdowns promoted ill-health by suppressing the immune system. [Lack of sunshine, masks, lack of fresh air, not enough exercise, loneliness, stress, poor nutrition, alcohol abuse etc.]
- Black people are more susceptible to this virus due to the receptors required.
- The vaccines don't work; this can be statistically proven.
- There are multiple proven good treatments, such as Ivermectin.
- This is nothing different from what happened in 1930s Germany.

Fleming is also part of a group of doctors and scientists taking governments to the International Court of Human Rights for abuses of the Nuremberg Code, with the intent of prosecuting ministers, advisors, Fauci, doctors and the media for crimes against humanity. Fleming and his colleagues are being tracked.

See his book, *'Is Covid-19 a bio-weapon?'*

Matters arising

The vaccines are not safe

A UK evidence-based consulting group (advisor to the WHO) review of the Covid vaccines states that the Covid vaccines are not safe for human use and must be removed from the public: Dr Hamid Merchant (pharmacologist) says the vaccines are not safe. The European Medicines Agency also issued warnings after a review of vaccines.¹² Dr Tess Lawrie (contract analyst to the WHO) submitted a report to the MHRA proving that the vaccines are not safe for human use.¹³

A group of medics and clinicians petitioned the FDA to refrain from fully approving any Covid-19 vaccines this year. Their case was published in the BMJ.¹⁴

The FDA officially describes the Covid vaccines as '*genetic transfer programmes*' that formally require a five-year testing programme.

There has been no review by the FDA or the CDC of the effects of Covid vaccines. These should be done weekly based on adverse reaction reports.

A legal case in America has reported in evidence to a court that 45,000 Americans have died from the vaccines.

¹² Journal of Pharmaceutical Policy and Practice, 14, art. 32 (2021), 'Covid vaccines and thrombotic events: EMA issued warning to patients and healthcare professionals'.

¹³ Freedom Alliance, 'Open letter from Dr Tess Lawrie to chief exec MHRA Dr Raine – urgent report – Covid-19 vaccines unsafe for use in humans', 10 June 2021.

¹⁴ The BMJ Opinion, 'Why we petitioned the FDA to refrain from fully approving any covid-19 vaccine this year', 8 June 2021.

Dr Peter McCullough, the most cited doctor in the world, is utterly opposed to the vaccine, says it is not safe, and is demanding it be stopped. The vaccines have failed and have killed more people than Covid. New strains of Covid are being created by the vaccines.

ADE is already emerging (Dr Robert Malone, inventor of the mRNA vaccine technology). The wave of post-vaccine deaths from a cytokine storm is beginning.

The Japanese medicine regulator has found that those who have been vaccinated have a concentration of spike proteins in every organ of the body; in particular the ovaries. This is a bio-distribution study of the sort that the British MHRA has refused to undertake. [NB. the spike protein is toxic.]

The first US autopsy of a dead person vaccinated for Covid showed spike proteins in every organ. This is proof of what alternative doctors (like Sherri Tenpenny) have been saying for months.

Calls for ambulance services due to cardiac arrest and unconsciousness have surged since young adults started getting the Covid vaccine. [See Public Health England, 'Syndromic indicators at a glance'.] The Pfizer and Moderna vaccines now have warnings added to the safety labels regarding myocarditis and pericarditis in younger adults, usually after the second dose.

Pfizer admitted that viral shedding (infection from a vaccinated person to an unvaccinated person) occurs with its vaccine. There is a transfer of vaccine components person to person. Pfizer expressed strong fears about this. ['A phase 1/2/3, placebo-controlled, randomised, observer-blind, dose-finding study to evaluate the safety, tolerability, immunogenicity, and efficacy of SARS-Cov-2RNA vaccine candidates against Covid-19 in healthy individuals', (page 67).]

The vaccines don't work

The vaccines do not stop infection and they do not prevent serious illness. The Scottish Herald: '*Covid hospital admissions triple in over-60s – and nearly half of patients (are) fully vaccinated*'. [See *The Daily Sceptic*, 'Are the vaccines reducing hospitalisations?', Toby Young.]

The latest data from PHE shows the fatality rate in the vaccinated under-50s is 57% greater than in the unvaccinated. [PHE, Technical briefings 17 and 20. *The Daily Sceptic*, Will Jones, 'Alarming data from PHE ...'.]

Israel is 90% vaccinated but new Covid cases include over 70%-vaccinated people.

27 July 2021: The CDC director (Rochelle Walensky) stated that vaccines are failing and that vaccinated people may now carry higher viral loads than unvaccinated people, contributing to the spread of Covid. Fully vaccinated people can catch and spread the virus. The Delta variant makes it easier for vaccinated people to transmit the virus. Vaccinated people, as predicted, are super-spreaders. So why virus passports? Walensky also said that the virus is just a few mutations away from rendering all existing vaccines obsolete. Vaccinated people are also the super-breeders of variants.

Fauci admitted that Covid vaccines are spreading disease. [Face the Nation, interview; – video deleted.]

Vaccine immunity is now stated to only last six weeks. After this you become MORE vulnerable to the virus.

In California, the highest count of new Covid cases is being recorded in counties with the highest vaccination rates.

The majority of Covid cases in British hospitals are vaccinated people. In addition, hospitals are now being overrun and two have announced a state of emergency due to the huge backlog of people who put off going to hospital during the lockdowns and are now presenting at A and E. For hospitals to be in crisis in the summer is unprecedented. If the predicted ADE¹⁵ crisis appears in September onwards, hospitals will collapse with serious ill vaccinated people.

The Kings College Zoë App, as of 15 July 2021, shows cases amongst the unvaccinated going down but the cases in the vaccinated group rising. The Health Secretary, Sajid Javid, was typical, announcing on 17 July that despite two jabs he tested positive.

Dr Jane Ruby affirmed that the majority of hospitalised Covid patients are vaccinated. [The Stew Peters Show.] She specifically itemised Britain and Israel. Patients are presenting with serious conditions after being vaccinated in February or March.

30 July 2021: The CDC published research proving that 74% of people testing positive were vaccinated with both jabs. 90% of the infections were the Delta variant. They used this data to demand that people mask up again. This proved the lie of health officials, such as Fauci, that affirmed that the fourfold rise in US Covid cases since June was caused by unvaccinated people. In addition the viral loads were high meaning that there was an increased rate of transmission amongst the vaccinated.

Data from Public Health England (PHE) shows that fully vaccinated people are 65% more likely to be hospitalised and 1540% more likely to die from Covid than people who are unvaccinated.¹⁶

PHE data confirms that new infections peaked and dropped in the unvaccinated before they did in the vaccinated.¹⁷

A panel of experts told MPs that there is no way of stopping Covid from spreading through the entire population because the vaccines don't prevent infection and transmission. Community testing should also be terminated.¹⁸

The world's most vaccinated nations (ranked by Johns Hopkins University) are also some of the highest at risk for Covid surges (as categorised by the CDC as at risk for travel).

Variants

As many epidemiologists warned (e.g. Dr Bossche), and I wrote months ago, it is the vaccination programme that is initiating the variants. When overused, vaccines can cause mutations just like antibiotic resistance. The process is called 'leaky vaccines'.

The current variants can all be traced to areas where there was an earlier vaccine testing programme (India, Britain, Brazil, America, South Africa). For example, the Indian Delta variant was first identified in December 2020 just a few weeks after the Phase 3 testing

¹⁵ Antibody Dependent Enhancement or Viral Interference. The condition where vaccines cause a cytokine storm when the person next gets infected with a similar virus. The immune system attacks the organs; usually fatally.

Corruption and conflict of interests

Rick Bright, the person who blocked Hydroxychloroquine to America, joined Pfizer.

Stephen Hahn, former FDA commissioner who blocked Ivermectin and Hydroxychloroquine, joined Moderna.

The NIH (US National Institutes of Health) co-owns the Moderna vaccine patent.

DIVOC

This is an open-source, digital platform for large-scale vaccination credentialing programs. It is used for credentialing Covid vaccines.

It is built upon the generalised electronic registry and credentialing framework of the OpenSABER project under Sunbird Registry and Credentialing.

Its use in India has already issued more than 100 million digitally verifiable credentials. For example, it can include: vaccine approval, procurement, supply chain logistics, capacity building, testing, training certification, field support, management and feedback. There are already 20 DIVOC labs in India with more being built.

Note that DIVOC is 'Covid' spelt backwards. Luciferians love reversing words to hide connections. In Latin it would mean 'to call apart'. In Greek it would mean 'to call twice'.

PCR tests

The CDC has decided to terminate the PCR tests on 31 December because they cannot distinguish between Covid and Flu. Why is Britain still enforcing them on travellers and others?

The FDA admits that the PCR test for Covid was developed without isolated Covid samples. Thus it is a complete fraud. The genetic material for a marker was from the common cold.¹⁹ People who had a cold or Flu tested positive and became Covid cases. This is why Flu disappeared in 2020.

Genocide of the elderly

The treatment of the elderly, especially in care homes, throughout this crisis has resulted in many thousands of unnecessary deaths. This can genuinely be called genocide. The elderly were refused medical treatment, refused to have a doctor attend them, were kicked out of hospitals to care homes with no support where they infected many others, were often left without food, water and due care (in hospitals and some care homes) and all the time forbidden to see their loved ones. Many died in deep anxiety, depression and loneliness. It is a crime that God will remember of the Day of Judgment. May God bring vengeance on the guilty.

The average age of people dying from Covid in Italy was 79.5. Italy's National Institute of Health.

Deaths in UK Care homes tripled in three weeks after the vaccine was introduced.

A whistleblower posted two videos explaining how the elderly are being systematically murdered.²⁰ This is largely done by prescribing morphine (to reduce pain) and Midazolam (to cause sleepiness). In reality it means that hospitals can then ignore these patients who will not complain or cry out as they are starved and left thirsty in their own filth (it's called 'a care pathway'). Midazolam is highly toxic and has never been authorised. It is a substance used in executions by lethal injection. But the dose given to old people is five times what is normally medically prescribed (10 mg instead of 2). It can also hinder breathing and lower blood pressure. The whistleblower also discovered that multiple hospices and care homes have death rates far in excess of the norm. One near me has about ten times the death rate than is normal. He contacted the police and other authorities, which refused to take any action. Shortly after posting these videos and complaining to the authorities, the healthy middle-aged whistleblower mysteriously died. He was trying to secure an interview with the UK Column to expose the genocide at the time.

Compensation

The government makes it extremely difficult for relatives to get compensation for the maiming and death of loved ones. No compensation is payable unless it can be proved that there has been 60% disability caused by a vaccine. For people that died this cannot be proved.

Totalitarianism

No end in sight

Various establishment lackeys have mentioned an end date of 2025. The World Bank has established that the pandemic period will last until March 2025. The 'New Normal' is supposed to be activated in 2025. The NHS has stated that waiting times will not return to normal until 2025. The emergency morgues being contracted out (see later) last until 2025.

Despite the virus scare coming to an end, when even Neil Ferguson says the epidemic is over, with statistics showing low levels of deaths and hospitalisation, the government is extending various Covid contracts. It has advertised jobs and contracts dealing with contact tracing that extend for three years.

American states are advertising for thousands of Covid jobs, such as contact tracers, researchers, vaccine co-ordinators, facility testers, investigators and so on. These are full-time well-paid jobs with no end date.

Scotland is advertising for multiple Covid jobs in all counties, paid on average £130 a day. These include, Covid tester assistant, Covid tester, Covid customer service, Covid contact tracer etc.

New Zealand has said that it won't open its borders to vaccinated travellers until 2022.

Scripted media

The proof that the media worldwide is following a set script mandated by the elite is proved by the use of the number 233 regarding cases. A search will show nation after

²⁰ UK Column posted these.

nation, state after state, mentioning that there has been a sudden surge of 233 cases. There are dozens of cases of this. This would be statistically impossible in real life.²¹

Isolating the unvaccinated

The local government of Lapu-Lapu in the Philippines issued an executive order that unvaccinated people are banned from purchasing food.

America is on the verge of making vaccines mandatory. Due to the low take up of vaccines amongst the army, the US government is saying that it will mandate it for all forces.

Macron has made vaccine passports necessary for continuing normal life. As a result, France is on the brink of civil war with demonstrations becoming violent. However, in some protests the police switched sides and marched with the activists.

Police violence

A British police officer who kicked a 15-year old boy in the head during lockdown has been convicted of assault.

US police violently arrested and broke the arm of a 73-year old woman suffering from dementia.

Taking children

There has long been a process of the state kidnapping children from their parents under various excuses. In many cases, these children are then abused. The UK Column has been analysing this for many years.

Now we have the state stealing children from parents on the basis of Covid restrictions. I have seen a video of Israeli police taking a baby from a screaming mother. In Britain an 11-year old girl was taken by police in the night from her father. The reason given was due to his denial of Covid and the vaccine He was also home schooling her.

Prison camps

Various countries are erecting new prison camps, e.g. Canada, America, Australia, Britain, New Zealand.

I have seen a prison camp being built in Britain that is the size of a small town. The government will admit that it is a prison but offer no other information. It is not being built like a traditional prison.

That these camps are for unvaccinated non-conformists is proven by the first executive order. On 6 August Tennessee governor Bill Lee signed Executive Order 83 which authorises the National Guard and State Guard troops to break into people's homes, kidnap them at gunpoint and incarcerate them in a Covid internment camp – without any due legal process. The camps are called '*temporary quarantine and isolation facilities*'.²²

The CDC announced that Covid camps will be set up on a nationwide basis with people being medically kidnapped and taken to '*humanitarian settings*' but with the minimum of humanitarian standards.²³ The purpose of this is alleged to separate '*high-risk*' individuals,

²¹ Bible Science Forum, 'Exactly 233 Covid cases? Proof of international collusion in the news media', John Gideon Hartnett, 7 August 2021. This article alone shows 17 examples of worldwide news media. He references another 69.

meaning the elderly and sick, from the main population to protect it from infection. Couples and families will be separated. The camps are called 'Green Zones' for shielding. The sort of people targeted for this includes over 60s and people with chronic illness, such as hypertension. [Notice the use of more and more names using the word 'Green'. Also the fear narrative is being directed towards global warming and doomsday.]

The Western world has now fully become 1930s Germany.

Opinion

Surely only a fool can now deny that this process has been nothing to do with a virus (not that it even exists) but is about social control and a programme of revolutionary social change. I said that right at the beginning of this mess 18 months ago. It is truer today.

It is all about social control, social coercion and social manipulation. This is achieved through illegal regulations, destroying centuries old conventions and the massive use of behavioural psychology and neurolinguistic programming to create fear and make people compliant. The end goal is a world population of slaves.²⁴

We are now at the point where non-conformists are close to being illegally rounded up and incarcerated in prison camps.

When doctors all around the world are condemning the vaccines as highly dangerous and toxic, and yet the government is forcing them upon young children (let alone adults) we are in something worse than a dystopia; we are in a world run by psychopaths and Satanists.

You need to wake up and see the agenda.

The coming mass death event

Warnings

You can never exclude the possibility that there will be some new disease ... we may have a rough winter for all sorts of reasons.

Boris Johnson, *The Telegraph*, Maighna Nanu & Catherine Neilan, 'Boris Johnson warns of summer travel disruption as he plays down double vaccination plan', 21 June 2021.

The British government warned that 2.6 billion people may die as a result of the mutations coming from the Covid vaccines. [SPARS (sic) Pandemic simulation document 2025-2028, which developed into the Crimson Contagion exercise.]²⁵ The reality will be ADE and viral shedding not variants.²⁶

The SPI-M²⁷ 'experts' have already advised the government that there will be a third wave of Covid infections in the autumn and it will result in mass deaths and new lockdowns, but the deaths are amongst the vaccinated:

*The resurgence in both hospitalisations and deaths is dominated by those that have received two doses of the vaccine, comprising around 60% and 70% of the wave respectively.*²⁸

²⁴ This is also the published end goal of the various factions within the global elite: Talmudic Zionists (the Talmud promises every Jew 2,800 slaves in the messianic age when Jews rule the world [*Zohar*, Toldoth Noah, 63b and *Simeon Haddersen*, fol. 56D]), Communists, Freemasons, bankers and corporatists.

²⁵ InfoWars, 'Emergency alert! British gov't warns Covid vaccines-induced mutations may kill 2.6 billion people.', 1 August 2021. 'SPARS pandemic 2025-2028 – a futuristic scenario for public health risk communicators'; A Johns Hopkins University simulation (2017).

²⁶ This is where the vaccinated become spreaders of the virus.

²⁷ Scientific Pandemic Influenza Group on Modelling.

²⁸ 'Summary of further modelling of easing of restrictions – Roadmap Step 2', Section 32.

Most deaths and admissions in a post-Roadmap resurgence are in people who have received two vaccine doses.²⁹

This is being driven by computer modelling from Warwick University and Imperial College.

So the government agrees with me that the vaccines are going to cause mass death; at least 300 a day (vaccinated people account for 250). Fully vaccinated people will account for 60-70% of hospital admissions.

Emergency morgues

UK councils have been asked by government to set up emergency body-storage centres for this autumn and purchase large numbers of body-bags. The contract published by Westminster City Council was one example. The contract period for this continues for four years and is worth £6 million. Many factors are pointing to social disruption continuing until 2025.

Emergency morgues were already being established in the spring after the virus peak in March/April 2021. This is part of the government's 'Excess death contingency planning' strategy and 'mass-death preparedness plans'. These plans were not enacted during the Swine Flu and SARS pandemics nor in the heat of the virus epidemic in March 2020.

Emergency morgues were set up at Norwich, Newcastle, Bristol, Wanstead Flats, Leatherhead, Leeds, Poole, Salisbury and Aylesford (Kent).

Ruislip, West London council set up an overflow morgue for 1,300 bodies and built the third biggest crematorium costing £4 million.

Kent established three emergency morgues to store 3,000 bodies at a cost of £11 million.

A morgue centre was set up at a disused RAF site in Oxfordshire to hold 5,000 dead.

- Metro, 'The huge temporary morgues being built across the UK for coronavirus dead', Jen Mills, 31 March 2021.
- Mail Online, 'Overflow morgue for 1,3400 bodies ...', Mark Duell, 14 January 2021.
- Yahoo news, 'Coronavirus: temporary morgues being built to cope with death toll', Emily Cleary, 6 April 2021.

Conscientious whistleblower undertakers have explained that last year (2020) business was pretty much as usual; that is, the death rate was normal. This year, since the vaccine roll out, the death rate has skyrocketed and undertakers are having trouble coping with the amount of clients. This suggests that the real death rate is much higher than government figures.

Dr Sam White

Sam White is just one example of a conscientious doctor committed to caring for patients properly who has spoken out about the fraud of Covid and the danger of vaccines. For expressing his views on social media he has been suspended from the NHS and lost his job, even though other doctors have done the same.

²⁹ Ibid, Section 56.

He made a video of his testimony which went viral, with over a million views in a few weeks, and shows the wickedness of the establishment. As a result of this expose, he has been warned that his life is at risk.

The bare bones of this testimony is:

- He was a partner in a thriving GP practice.
- He has been a doctor for 24 years with a breadth of experience.
- There are safe, proven, cheap treatments for Covid (HCQ, Ivermectin, and budesonide). The NHS is not allowed to use them.
- The vaccine is genetic manipulation.
- The Yellow Card system shows huge amounts of adverse reactions and these are about 1% of the real figure.
- The PCR test is a fraud.
- Do not have the vaccine.
- We need to re-establish Common Law.
- Facemasks cause problems with respiratory systems. He has never worn a mask.
- He wrote an open letter to Sir Simon Stevens head of the NHS via his lawyer (look this up). It is unassailable and has not yet received a reply. It alleges criminal conduct and breach of legal obligations by leaders in the NHS. The chief legal points are: 1) the vaccine programme has been rolled out in breach of legal regulations for clinicians to obtain free and informed consent of those vaccinated. 2) The requirement to wear facemasks in the NHS is in breach of Common Law obligations not to cause harm and breached statutory obligations in relation to provision of PPE. It claims that White has been victimised and harassed for telling the truth. The people alleged to have acted illegally are listed as: the government, the executive board of the NHS, SAGE, senior public office leaders, the executive board of the MHRA. There is a great more clinical detail in the letter and exposes of financial connections between government advisors and ministers with the vaccine industry and Bill Gates.

White now practices as a Functional Medicine doctor (i.e. not allopathic) and tries to eke out a living privately. He is passionate about health and preventive action (nutrition). He typically spends 40 minutes with any patient trying to get to the root of problems, as opposed to ten minutes and prescribing a pill.

Dr Ryan Cole

Cole is the CEO and the Medical Director of Cole Diagnostics; an independent lab in Idaho. He is a formally trained pathologist but also has PhD. experience in immunology and virology and has seen over 350,000 patients in his career. In a lecture from April 2021 he discussed cures for Covid and the problem of the vaccines. In another lecture in Texas in August, he gave a presentation to Frontline Doctors.

Cole said,

The spike is the toxin. ... We are spending billions on advertising the 'clot shots' to children. ... Why in the world would we put a toxin into the human body that is going to disrupt the blood vessels in your brain, allow the spike in there, and cause inflammation? ... This isn't a vaccine. They keep lying to the public by calling this a vaccine. It's an experiment on humanity.... Once you have heart damage the heart does not heal itself. The heart is damaged forever. We're ruining kid's hearts for life with these shots. We need to stop the insanity immediately. This is over. Game over. This is no longer good science. This is a poisonous attack on our population and it needs to stop now. (sic.)

He lamented that billions is being spent on advertising to improve the vaccine take up but nothing on the science to study the effects on the population.

He proved his points showing that the vaccine causes specific inflammation in the organs by showing photographic slides of actual damage to actual organs caused by the vaccines. He also said that he has seen an increase in cancer cases since the shots began.

His short lecture should be watched.

The Pfizer contract

A journalist managed to get a copy of the secret Pfizer contract signed by national governments. It is shocking. I will summarise some key points:

- Governments cannot pull out of the vaccine programme even if a better effective treatment is found (hence the outlawing of HCQ and Ivermectin).
- Pfizer cannot be held liable for delivery delays or missed deliveries. Orders cannot be cancelled. Purchasers waive all rights and remedies at law.
- The vaccines cannot be returned.
- The long-term efficacy of the vaccine is not known and there may be adverse events.
- Pfizer is not liable for anything related to the vaccine. There can be no claims.

Dr Sucharit Bhakdi on Covid vaccines

Dr Bhakdi has a video summarising the latest published papers analysing how the immune system combats Covid and how the vaccine destroys blood vessels causing clotting. This is published medical analysis, not some sort of speculation.

I will try to summarise this without getting too technical, adding some of my own material.

The immune response

Recent scientific papers have demonstrated what Mike Yeadon affirmed months ago, that the supposedly novel coronavirus is not so new that the immune system cannot recognise it. Because it is so similar to known coronaviruses, the immune system recognises it as a threat and springs into action. This puts paid to the idea of a need for universal vaccines.

The immune system makes many different components; one of these is antibodies. It takes about four weeks to make new antibodies. If the immune system remembers the pathogen it very quickly makes IGG and IGA antibodies. These try to prevent the pathogen getting into cells. If the cells do get infected then lymphocytes³⁰ and leucocytes (white blood cells) kill the cell to stop the virus factory.

Three research groups studied how fast the immune system reacted to coronavirus. The response was fast with IGG and IGA antibodies. All the Covid variants are identified by the immune system and are defeated. Herd immunity is already present and ready to be actioned and kills the virus before it gets to the lungs. 99% of people have this immune

³⁰ A form of small leucocyte (white blood cell) with a single round nucleus, occurring especially in the lymphatic system.

response ready. There is no need for dread of Covid coronavirus. Vaccination is not necessary.

The damage caused by the mRNA-created spike protein

The latest evidence proves what we already knew. The mRNA vaccine controls the body's cells making them code for the spike protein. Every cell begins to manufacture the spike protein. However, the genes immediately enter the cell walls of the blood vessels first and create spike proteins.

The cells populating the lining of the blood vessels gradually develop spike proteins, which protrude from the cell's surface and these are recognised by the immune system, which then attacks them with lymphocytes to get rid of them. This is done in the two stages mentioned above.

The first response by the leucocytes begins the process of attacking the cells causing some damage. However, the later response (after 30 days) by antibodies continues this attack and destroys the cells. The immune system will try to eat the blood vessel cells. The body is now in a fight for life between the immune system attacking blood vessel cells and other systems (such as cholesterol and platelets) trying to repair the damage to the vessel lining.

This is what causes both bleeding and blood clots, which then pass to organs causing failure, such as heart attack, thrombosis or stroke. It is almost impossible to survive this attack.

Dr Charles Hoffe on Covid vaccines

Tests of vaccinated people show signs of new onset blood clotting. As a result of warning about this, Hoffe was relieved of his emergency room duties, losing half of his income. He noticed that his patients that had been vaccinated had their capillaries plugging up which will lead to cardiovascular damage.

The mRNA causes the body to become a spike protein factory and these mass-produced spike proteins cause progressive blood clotting. Hoffe claims that 60% of vaccinated people will suffer from blood clots that will eventually kill them.

Only 25% of the vaccine contents remain in the arm. The rest is collected by the lymphatic system and fed into the circulation system. A single dose of the Moderna vaccine contains 40 trillion mRNA molecules.

The mRNA was designed to go into the cells of the body, but the only place they end up is in the blood vessels and capillary networks. Trillions of the spike proteins are then created and stick out of the cell wall of the lining of the blood vessels (the vascular endothelium). The cell walls of blood vessels are intended to be smooth so that blood flows well but now the protruding spikes hinders the blood flow and cause clots in capillaries. Blood platelets (which detect damaged vessels) circulate around trying to fix the problem by creating increasingly more clots. The platelet hits the spikes in the capillary and forms blood clots that block the vessel.

These blood clots are different to the 'rare' big clots mentioned in the media that show up on CT scans and MRIs and cause strokes. They are microscopic and do not show up on scans and can only be detected using a blood test known as D-dimer which shows recent blood clots. Using this blood test Hoffe discovered blood clots in his 62% of his vaccinated patients. Key organs that cannot regenerate, such as the brain, spinal cord, heart and lungs are permanently damaged by these blood clots, leading to death within three years.

With each successive shot the damage is cumulative.

Quotes from concerned doctors³¹

Dr Peter McCullough

There's a whole variety of cerebral, cerebellar, even peripheral nervous system abnormalities [from the vaccines]. ... I've seen it in my clinic and they seem to be emerging three, four or five, six months later after vaccination. ... So I'm getting increasingly alarmed here that this is not just a simple one or two day problem. And so there's great concern, particularly in younger kids that over a course of three or six or nine months, they'll end up with heart failure or cardiac death. ... What I see is, potentially ... a large number of Americans and people around the world with a new chronic disease of some sort of neurodegenerative disease or cardiac disease.

Dr Vladimir Zelenko

I'm just going to give you the perspective of a clinician who deals with people that are dying ... 4 million dead people can testify to the unique clinical syndrome to put them there. Basically, a natural animal virus was changed to infect humans, and then its lethality was augmented to cause blood clots and lung damage.

And the concept here, we're dealing with a Hitler/Stalin type of mentality with weapons of mass destruction

Dr Tess Lawrie

[The vaccines are] actually not safe for anybody and it's clear. The databases are screaming. The databases are early warning systems, and the databases around the world are screaming that we are facing a tsunami of chronic disease.

Dr Richard Urso

Early on, we were seeing things, mostly thrombotic, but later, as we get into two and three months [after vaccination], we're seeing a lot of inflammatory issues. I've had a host of people with inflammatory ocular disorders, as well as having orbital inflammatory diseases. I typically don't see this rash number of people.

Dr Richard Fleming

You're going to see an inflammable thrombotic response. That's the primary thing that people are noticing, be that heart disease or retinol disease. [Prions are] also a chronic smouldering disease. ... What we've seen is something that's been implemented that is an ideal bio-weapon. ... This is an inflammable thrombotic process affecting every organ system and prion diseases that not only affect the brain, but also affect the heart and other vital organs.

Dr Ryan Cole

I'm seeing countless adverse reactions ... It's really post-vaccination immunodeficiency syndrome ... I'm seeing a marked increase in herpetic family viruses, human papilloma viruses in the post-vaccinated. ... I have seen ... about a 10 to 20-fold increase of uterine cancer. ... Post-vaccinated patients are having diseases that we normally don't see at rates that are ... alarming.

Dr Sherri Tenpenny

We're injecting a synthetically made messenger RNA and strips of synthetically made double-stranded DNA by different mechanisms, and if that transmission goes to the other person [viral shedding], they don't get Covid, ... they just get bleeding, they get blood clots, they get headaches, they get heart disease.

³¹ Mercola.com 'Awareness Foundation Covid-19 round table', 15 August 2021.

Conclusion

This is conclusive evidence of everything I have been saying for over a year. The patent records demonstrate that the Covid crisis has been artificially created in order to generate profit and population control.

The elite needed a global pandemic to subdue the world's population in order to proceed with a number of aims to be achieved through universal vaccines. These include global surveillance, data capture, depopulation and so on. They engineered the weaponised pathogen and the spike protein vaccine in order to achieve this but also to make trillions of dollars at the same time.

This is the culmination of satanic psychopathy combined with greed.
